Make Your Own Fossils

You can make your own fossils right at home! Ask a parent for help and follow this recipe. Your adventure starts here!

Supplies
- 2 cups flour (use wheat flour to make a darker dough that looks more natural)
- 1 cup salt
- 1/2 cup warm water
- small plastic animals, insects, or leaves, etc.

Directions:
Step 1: Mix the flour, salt and warm water together to make the salt dough.
Step 2: Make a small ball of dough, then press it flat with the palm of your hand.
Step 3: Gently press a small toy into the dough. Then, gently remove the small object to reveal its impression!
Step 4: Arrange your “fossils” on a baking sheet and bake at 250 degrees for 1-2 hours. Remove once they are hard.
